Personal Precautions:
Observe precautions from other sections. Call 3M- HELPS line (1-800-364-3577) for more information on handling and managing the spill.
Spill Response:
Evacuate unprotected and untrained personnel from hazard area. The spill should be cleaned up by qualified personnel. Remove all ignition sources such as flames, smoking materials, and electrical spark sources. Use only non-sparking tools. Place leaking containers in a well-ventilated area, preferably in an exhaust hood, if available, or outdoors. Ventilate the area with fresh air. Contain spill.

12 Ecological Information

Environmental Data:

Persistence/Biodegradability:

The components labeled 'readily biodegradable' are expected to fully degrade in wastewater treatment and in most aerobic water or soil environments. The surfactant(s) contained in this preparation comply with the biodegradability criteria as laid down in Regulation (EC) No.648/2004 on detergents.

Bioaccumulation Potential:

The components labeled 'Log Kow <3' have measured or calculated log Kow values <3 indicating they are unlikely to bioconcentrate to high concentrations in aquatic organisms by partitioning into lipid tissues. The components labeled 'Bioconcentration-factor (BCF) not determined' have little or no information on their potential to bioconcentrate or accumulate in aquatic organisms.

Ecotoxicity Data:

There is insufficient component information to calculate the ecotoxicity of this product. There is insufficient component information to calculate the wastewater treatment system effects of this product. The components labeled 'No information' have no environmental fate and effects data available. Not determined.

Ecofate Data:

Not determined.

Special statements for 2001/58/EC:

A conservative assessment indicates this product presents a low environmental risk because use and disposal are unlikely to result in the significant release of components to the environment.
